**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-2 and 21-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Hattori.

Hattori discloses a cleaning device 6 (Fig. 4) comprising a brush roller 6a having a brush that contacts a surface of a member 22 to be cleaned due to a weight of the brush roller and rotates by following a movement of the surface. Hattori further discloses that the member to be cleaned is a charge roller that faces an image carrier 21 for charging the image carrier (Col. 5, lines 38-67).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-20 and 25-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hattori in view of Swift.

Hattori further discloses the member 22 to be cleaned comprising a cylindrical rotary body and the brush contacts a surface of the rotary body at a position above a horizontal plane containing an axis of the rotary body (Fig. 4).

As explained above, Hattori discloses every aspects of Applicant's claimed invention however fails to disclose a specific structure of the brush having a filaments with a length of 2 mm or below, a diameter of 2 denier or below, and a density of 20,000 filaments per square cm or above.

Swift discloses a cleaning brush 26 having filaments with a length of below 2 mm, a diameter that is less than 2 deniers, and a density above 20,000 filaments per square cm (Col. 3, lines 30-34).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the teaching of Swift to the device of Hattori because such cleaning brush structure discussed above is well known and old in the art as is taught by Swift.
